WHAT YOU NEED

- **A smart device** *(either a phone or tablet with bluetooth connectivity)*

- **The 'Skoog' App**

- **Compatible with Mac/ iPhone/iPad only** *(more information about compatibility can be found* here*)*

ACTIVITY IDEAS

Check out the Skoog music YouTube Channel for more ideas, tips and tricks.

BEFORE YOU START

- Download app
- Charge the Skoog cube using the USB cable with the Kit

SET UP
(CONNECTING TO SKOOG CUBE)

1. Open up Skoog App *(the app will also have instructions for you to follow)*

2. Find the button on the bottom of Skoog base

3. Press the button once to wake up the Skoog Cube *(the green light on the side closest to the button will illuminate)*

4. Press the button once more to activate Bluetooth *(the blue light on the side closest to the button will illuminate)*

5. Tap to select your skoog from the list in the app, if successful your skoog will appear as connected *(you can then press 'continue')*
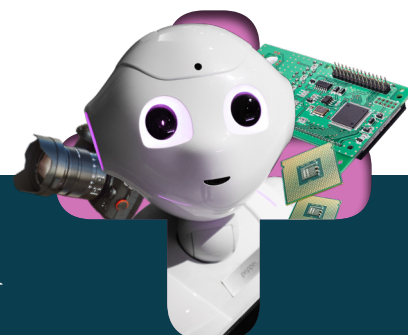

IMPORTANT: if asked to pair with your device tap CANCEL, your Skoog will still connect and function as normal

(if you have paired accidentally, you will need to go into your devices bluetooth settings and forget/unpair it)

CALIBRATION

To calibrate the Skoog Cube press the calibrate button *(the process takes about 5 seconds)*

It's important that you do not touch or move your skoog during the callibration process… if you do, simply press the calibration button again

HOW TO PLAY

There are 5 sides to your Skoog
(red, blue, yellow, green, orange).
Each side plays a different note

As well as pressing within the coloured
circles you can also squeese the skoog
on it's sides, edges and corners

When you first start using the app, you will
be walked through a tutorial how the skoog
works once you have connected to it.

PLAYING WITH APP

Within the app you
should have options to

- **Scales:** Adjust the Scale
  (how high or low the notes are)

- **Instruments:** Adjust the type of notes
  you are playing

- **Settings:** adjust the sensitivity of the notes
  (individually or as a whole)

- **MIDI:** Select your MIDI output channels
  (if applicable)

The **Bluetooth MIDI Devices menu**
allows you to connect your Skoog device
to the Skoog App.

Make sure Bluetooth is switched on in your
device settings.

Connect your Skoog by selecting it
from the Bluetooth MIDI Device Menu.

TROUBLESHOOTING AND SUPPORT

There is an excellent
collection of support
documents and videos here

We'd love to see your stories!
